

DSS MQISSP Measure Selection Criteria

Leverage current PCMH reporting.

Primarily claims based.

Nationally recognized.

Use common CPT and HCPCS codes (not CPT II codes).

Do not have extended look-back periods.

Relevance to Medicaid population:

- Advance the emphasis on preventative and primary care.
- Focus on conditions highly prevalent in Medicaid.

SIM proposed measures may supplement the MQISSP measures.

Enhance methods to identify and eliminate under-service utilization.

DSS Overarching Goals

Ensure design is relevant to the Medicaid population.

Ensure design forwards the Department's emphasis on primary care and preventative services

Leverage Patient Centered Medical Homes (PCMH) quality reporting.

Include measures that illustrate improved performance.

Enhance safeguards to address under-utilization and access to care issues.
